International Research Opportunities

EXAMPLES OF INTERNATIONAL RESEARCH OPPORTUNITIES

The German Academic Exchange Service (DAAD) Undergraduate Scholarship Program - Germany

Highly qualified undergraduate students are invited to apply for scholarships funding study, senior thesis research and/or internships in Germany

The CERN Summer Student Program - Geneva, Switzerland (deadline Jan 2018). Students selected for the program will spend the summer working with active research groups at CERN, one of the world's premier international laboratories.

Ecole Polytechnique Fédérale de Lausanne (EPFL) – Switzerland. The Summer Research Program in Life Sciences and Technology at the Ecole Polytechnique Fédérale de Lausanne (EPFL), offers an intensive research training opportunity for undergraduate students interested in research careers in life sciences.

École Polytechnique, The Internship Program for International Students – France. Gives undergraduate and graduate students the opportunity to carry out a 3 to 6-month internship in laboratories from Ecole Polytechnique.

EuroScholars - Research at Nine Research Universities in Europe. Opportunity for advanced undergraduates from US and Canadian universities to conduct research at one of nine major research universities in Europe.

The Netherlands Foundation for Research in Astronomy (ASTRON) and the Joint Institute for VLBI in Europe (JIVE) Summer Research Programme - The Netherlands. The Programme enables astronomy students (graduate or advanced undergraduate) to spend the summer (10-12 weeks) at the Dwingeloo Observatory, conducting astronomical research under the supervision of ASTRON and JIVE staff members.

ThinkSwiss Research Scholarship Program - Multiple Locations in Switzerland. Supports highly motivated and qualified U.S. and Canadian undergraduate and graduate students to do research at a public Swiss university or research institute for 2 to 3 months.

Fulbright US Student Program (Research) - Various, World-wide. The Fulbright is a nationally prestigious opportunity for graduating students and alum to pursue international research of their own design in countries around the world.

Ku Leuven Internships - Leuven, Belgium. This internship allows undergraduate and masters students to conduct scientific research in an international setting.

Multidisciplinary International Research Training Program - Various Locations. The program provides support for undergraduate and graduate students to do health-related population-based research and training in developing countries.

NanoJapan: Summer Nanotechnology Research Internship Program – Japan. The NanoJapan program will select up to twelve (12) first and second-year undergraduate engineering or physics students who will be placed in a Japanese research lab.

National Science Foundation International Research Experience for Students Program – Brazil. The purpose of the University of Pittsburgh's IRES program is to create an innovative research experience in sustainable design for a select group of undergraduate engineering students who have high potential to pursue graduate education.

Partnerships for International Research and Education. Science and engineering students from all backgrounds (race, ethnicity, citizenship, and gender) who are interested in the enhancement of cyberinfrastructure or in applying cyberinfrastructure to solve society- and industry-driven problems are encouraged to apply.

The Pasteur Foundation Internship Program - Paris, France. The Pasteur Foundation created a summer internship program for American undergraduates who wish to pursue a scientific career and to expose them to an international laboratory experience.

Research Internships in Science and Engineering - Multiple locations within Germany. RISE is a summer internship program for undergraduate students from the United States, Canada and the UK in the fields of biology, chemistry, physics, earth sciences and engineering.

Singapore International Pre-Graduate Award – Singapore. Supports short-term research attachments for international students at A*STAR. A unique opportunity for top overseas students to experience the vibrant scientific environment in A*STAR Research Institutes and Consortia. Students will be able to work with distinguished and world-renowned researchers in A*STAR labs.

SIT Study Abroad - Multiple Locations Internationally.

PROFESSIONAL

Smithsonian Tropical Research Institute - Panama. Internships give interns the opportunity to meet and interact with scientists from around the world, gain hands-on experience in their area of academic interest, and delve into Panama's rich culture.

The Open School of Ethnography and Anthropology - Merida and Pisté, Mexico. Provides on-site, hands-on training in ethnography and anthropology.

Undergraduate Research Opportunities Program at RWTH Aachen University - Aachen, Germany. Aims to provide students with the opportunity to carry out their own research projects under the guidance of experienced RWTH researchers.

American Academy In Rome & the School of Classical Studies Research Fellowships: Supports advanced undergraduates to undertake research relevant to the Academy and School of Classical Studies.

Excavations at Tel Dor in Israel - Tel Dor, Israel. Students are instructed in modern archeological technique and become valued members of an international archeological team.
